

Missing Numbers

Missing number at the beginning?
Do the inverse and you are winning

$$\underline{\quad} - 5 = 15$$

$$15 + 5 = 20$$

$$\underline{\quad} + 8 = 12$$

$$12 - 8 = 4$$

$$\square - 14 = 6$$

$$\square - 19 = 1$$

$$\square - 8 = 4$$

$$\square - 4 = 7$$

$$\square - 15 = 4$$

$$\square - 9 = 9$$

$$\square + 14 = 20$$

$$\square + 11 = 14$$

$$\square + 7 = 16$$

$$\square + 12 = 19$$

$$\square + 9 = 18$$

$$\square + 3 = 10$$

Missing Numbers

Missing number at the beginning?
Do the inverse and you are winning

$$\underline{\quad} - 5 = 15$$

$$15 + 5 = 20$$

$$\underline{\quad} + 8 = 12$$

$$12 - 8 = 4$$

$$\square - 24 = 60$$

$$\square + 24 = 40$$

$$\square - 19 = 38$$

$$\square + 31 = 54$$

$$\square - 28 = 44$$

$$\square + 17 = 36$$

$$\square - 34 = 17$$

$$\square + 12 = 63$$

$$\square - 13 = 54$$

$$\square + 8 = 28$$

$$\square - 29 = 19$$

$$\square + 43 = 70$$
