Reasoning

1. Zain Thinks of a number between 10 and 20. She multiples it by 4 and then doubles his answer.
He said his answer is 120. .

What number did he start with?

2. Draw a line between each creature and the weight to show how much the animal might weigh.

250 kg

500 g

4 kg

100g

3. Look at the numbers: 20 32 15 10

Sam multiples one of these numbers with 7 and got answer 224 . What do you think the number was?
Show your calculation.
