

# Multiplication Word Problems

**Example:**

How many groups?

How many in each group?

Addition Sentence:

$$2 + 2 + 2 = 6$$

Multiplication sentence:

$$3 \times 2 = 6$$

**Directions:** Write a repeated addition sentence to match.

There are \_\_\_\_\_ equal groups with \_\_\_\_\_ in each.

$$\underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

There are \_\_\_\_\_ equal groups with \_\_\_\_\_ in each.

$$\underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

There are \_\_\_\_\_ equal groups with \_\_\_\_\_ in each.

$$\underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

There are \_\_\_\_\_ equal groups with \_\_\_\_\_ in each.

$$\underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

There are \_\_\_\_\_ equal groups with \_\_\_\_\_ in each.

$$\underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

There are \_\_\_\_\_ equal groups with \_\_\_\_\_ in each.
